TANK TRUCKS  
Tank Trucks are manufactured at the IFA-Fahrzeugbau\* in Leipzig-Plagwitz. They are mounted on truck chassis, and are delivered to the Soviet Union. Their equipment indicates that they are intended for use at airfields. The Reifenwerk Rifa delivers the tires and other rubber parts. As accessory equipment they have pipes, and also tubes shaped like double truncated cones. Actually, they are identical with the projectors for anti-tank rockets, according to the statements of workmen who installed the same tubes during the war.
